Introduce the Next generation of N Series Hotmelt System

MR. NIYAS ALI

Meet Mr. Niyas Ali, the visionary Managing Director of RIMCO, with over 16 years of expertise driving innovation and excellence in industrial solutions.

Impressive range of Hotmelt Gluing systems and accessories. The team delivers superior service, backed by professional and knowledgeable engineers. Visits to the store are always a pleasure.

About us

YOUR BOND STARTS HERE

RIMCO is a leading industrial machinery and hotmelt systems manufacturer, proudly serving industries across the UAE and beyond. As the only manufacturing company of its kind in the Middle East, we stand apart by delivering world-class equipment tailored to meet the unique demands of our clients.

With over 15 years of technical expertise, our dedicated team has built a reputation for quality, reliability, and innovation. We specialize in designing and producing advanced hotmelt gluing machines and industrial solutions that ensure efficiency, durability, and seamless performance in production lines.

Company in the
MIDDLE EAST

Whether you are a local business or a multinational enterprise, RIMCO is your trusted partner for industrial machinery and hotmelt systems in the Middle East and beyond.

We specialize in supplying compatible hotmelt spare parts at competitive prices for a wide range of hotmelt gluing machines. Our product range includes custom-made consumables such as modules, nozzles, hoses, and filters, tailored to meet your exact machine specifications. With expertise in part identification and customization, we ensure reliable solutions that optimize your production performance.

**UAE's Leading
Hotmelt
Dispensing Systems
Manufacturer**

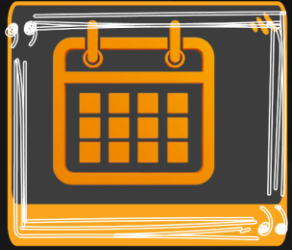

At RIMCO, we don't just supply machines—we provide end-to-end solutions that keep your operations running smoothly. From initial consultation and customized design to installation, training, and after-sales support, our focus is on delivering excellence at every stage. Our commitment is to innovation, customer satisfaction, and long-term partnerships. By combining advanced technology with deep industry knowledge, we help businesses improve productivity, reduce downtime, and achieve their goals with confidence.

MIDDLE EAST

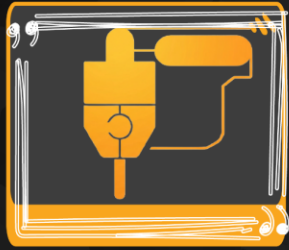

"Our Commitment to Innovation and Growth"

As the only specialized hotmelt machinery manufacturer in the Middle East, Rimco continues to invest in innovation, research, and customer support. Our organizational framework is designed not only to meet today's industry demands but also to adapt and grow with the future needs of our clients.

Our Philosophy

Rimco is committed to being a dynamic and self-sustaining global enterprise that creates and grows value for our employees, customers, shareholders, and communities. We conduct our business with integrity and social responsibility. Our employees are the driving force behind our continuous progress toward these goals.

Driven by a common set of beliefs and principles, Rimco's core values shape our culture and guide everyday decision-making throughout the organization. These shared ideals influence how we operate and interact, forming the foundation for our success and growth

Our Values

Integrity

We uphold honesty and ethical standards in all our interactions with employees, customers, shareholders, and the broader community. We are committed to doing what is right and maintaining uncompromising principles.

Respect for People

We value our employees and promote a culture of teamwork, diversity, and open communication. Safety is a priority, and we actively contribute to and support our communities.

Customer Commitment

Delivering superior quality and service is our top priority. We hold ourselves to higher standards to consistently exceed customer expectations.

Excellence

We pursue outstanding performance from our leadership, colleagues, and ourselves. We reject mediocrity and continuously seek innovative ways to add value.

Energy and Drive

We tackle challenges proactively with enthusiasm and determination. Our dedication fuels our progress, and complacency is never an option.

Automatic and Semi automatic end of line Packaging Solution

Our hotmelt gluing machine is configured as a complete, fully integrated adhesive application system designed for consistent, high-quality bonding. The setup includes the melter, heated hoses, and precision applicator guns, all working together to deliver reliable adhesive flow and accurate glue placement.

Hotmelt Pneumatic Pump System

The Rimco Nseries Hot Melt Unit with Pneumatic system is designed for high-performance, reliable, and precise adhesive dispensing in demanding industrial environments. Now enhanced with a Siemens PLC controller and intuitive HMI touchscreen, this system offers advanced control, seamless integration, and easy operation for packaging, assembly, and manufacturing lines-especially where high viscosity adhesives or long hose runs are required.

Wide Range of Melting Rates:

Available in various melting rate options - 4 kg, 7 kg, and 20 kg per hour-to meet different production volumes and requirements.

Rimco N-series Hot Melt Unit - Pneumatic Pump System with Siemens Components

The Rimco N-series Hot Melt Unit with pneumatic pump system is engineered for efficient, reliable, and precise adhesive dispensing in industrial environments. Now equipped with a Siemens PLC controller and user-friendly HMI touchscreen, this system ensures advanced control, seamless integration, and easy operation for packaging, assembly, and manufacturing lines.

Hotmelt Gear Pump System

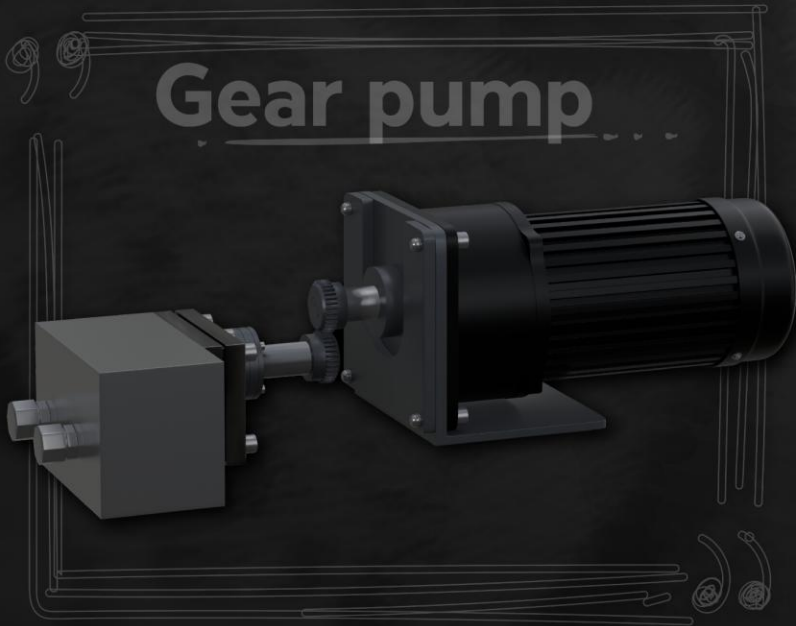

The Rimco Nseries Hot Melt Unit with gear pump system is designed for high-performance, reliable, and precise adhesive dispensing in demanding industrial environments. Now enhanced with a Siemens PLC controller and intuitive HMI touchscreen, this system offers advanced control, seamless integration, and easy operation for packaging, assembly, and manufacturing lines-especially where high viscosity adhesives or long hose runs are required.

Wide Range of Melting Rates:

Available in various melting rate options - 5 kg, 10 kg, 15kg, 20kg, 30kg, 50kg and 100 kg per hour-to meet different production volumes and requirements.

Rimco N-series Hot Melt Unit - Gear Pump System with Siemens Components

The Rimco N-series Hot Melt Unit with gear pump system is engineered for efficient, reliable, and precise adhesive dispensing in industrial environments. Now equipped with a Siemens PLC controller and user-friendly HMI touchscreen, this system ensures advanced control, seamless integration, and easy operation for packaging, assembly, and manufacturing lines.

HotMelt Gear Pump PUR System

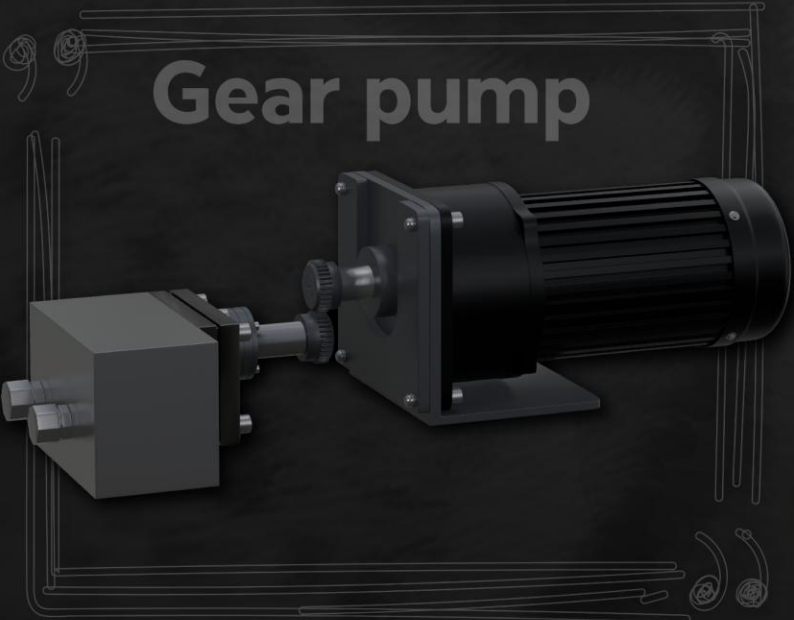

The Rimco N-series Hot Melt Unit with gear pump system is engineered for efficient, reliable, and precise adhesive dispensing in industrial environments. Now equipped with a Siemens PLC controller and user-friendly HMI touchscreen, this system ensures advanced control, seamless integration, and easy operation for packaging, assembly, and manufacturing lines.

Spur Gear Pump:

Allows precise and consistent adhesive delivery for both PUR and EVA types, handling a broad viscosity range efficiently.

Rimco Hot-melt glue machine NS-D 5

The Rimco NSD5 system is engineered for versatile hotmelt adhesive applications and utilizes a spur gear pump technology-making it well suited for dispensing both PUR (polyurethane reactive) adhesives and EVA (ethylene-vinyl acetate) glue. This system enables both manual and automatic pressure regulation for maximum process control and operational flexibility, which is essential for handling the varying viscosity and processing requirements of PUR and EVA adhesives.

RIMCO Titan Series - High-Capacity Hotmelt Gluing System

The RIMCO Titan Series represents our most powerful line of high-capacity hotmelt gluing System, engineered for industries that demand strength, precision, and continuous performance. Designed with large melt capacities, intelligent temperature control, and robust construction, Titan Series systems deliver consistent adhesive flow and reliable bonding in even the most demanding production environments.

Built for packaging, woodworking, bookbinding, textiles, automotive, and other large-scale applications, the Titan Series combines advanced technology with heavy-duty durability-making it the ideal solution for high-output, industrial adhesive operations.

Titan Series**
For Large Melt Capacities

Feature

Rimco is dedicated to delivering the highest quality adhesive dispensing and coating systems tailored for the food, beverage, packaging, and printing industries. Our products are engineered for precision, reliability, and long-lasting performance to meet the rigorous demands of modern manufacturing.

Innovation is at the core of everything we do. We continuously develop and integrate advanced technologies to create systems with enhanced features, user-friendly designs, and superior operational efficiency. This commitment ensures our solutions stay ahead of industry trends and deliver tangible productivity improvements.

Our customers are our priority. Rimco's responsive support and service teams work closely with clients to understand their unique needs and provide expert guidance, timely maintenance, and dependable after-sales care. We believe that strong partnerships built on trust and mutual success are the foundation of our growth.

Looking ahead, our leadership envisions a future where Rimco is recognized as the regional benchmark for excellence in adhesive and coating technologies, supported by a passionate team dedicated to helping customers achieve manufacturing excellence every day.

Why Rimco?

At Rimco, we deliver more than just machinery - we provide dependable hotmelt solutions that keep your production running smoothly. Our systems are designed with your business in mind, combining innovation, durability, and ease of use.

Universal Compatibility

Designed to integrate seamlessly with most hotmelt units, making upgrades simple and cost-effective.

Reliable Adhesion

Engineered for precision and consistency, ensuring strong, lasting bonds every time.

Enhanced Efficiency

Faster melting technology minimizes downtime and maximizes adhesive performance.

User-Friendly Operation

Intuitive controls and straightforward setup reduce operator training time.

Durable & Cost-Effective

Built with high-quality components that ensure long service life with minimal maintenance costs.

Regional Expertise

The only specialized hotmelt machinery manufacturer in the Middle East.

Proven Experience

Backed by over 15 years of technical expertise in industrial gluing solutions.

Custom Engineering Solutions

Machines tailored to meet unique industrial requirements.

Comprehensive Support

Installation, training, spare parts, and after-sales service to keep operations smooth.

Global Standards

Manufactured to meet international quality, safety, and performance benchmarks.
